

CHEMFAB® Laminates

CHEMFAB® Laminates...Layers above the rest!

Saint-Gobain Performance Plastics Corporation offers a unique line of flexible, non-porous PTFE-laminated composites that combine the features of multi-layer fluoropolymer cast films with the mechanical properties of fiber glass fabrics.

Multi-layer Cast PTFE Film

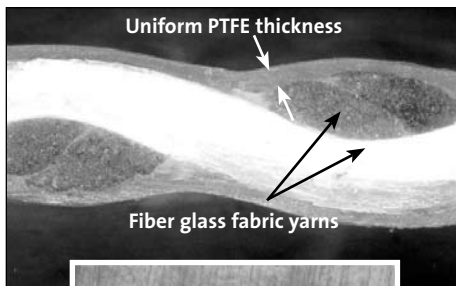

- Built up in layers similar to multiple dipping of a candle
- Crack and pinhole free
- Each layer can be modified for specific properties such as hardened surface layers or special colors
- Patented technology – only available through Saint-Gobain Performance Plastics Corporation

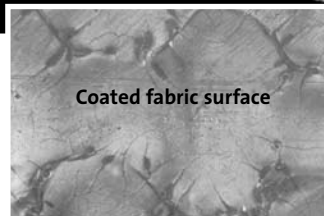

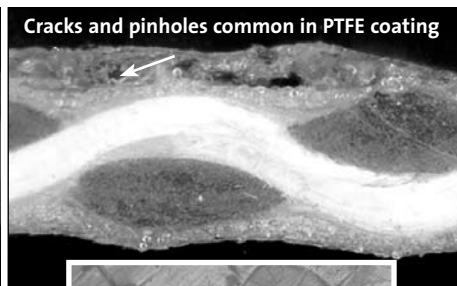

Laminated Composites

- Crack and pinhole free surface results in low permeation properties, low grease wicking and long-term release properties for easy cleaning
- Uniform PTFE thickness over the texture of the fiber glass fabric reinforcement eliminates thin spots in coating that can cause premature failure
- Fewer heat cycles required during composite manufacture results in higher fiber glass strength

CHEMFAB PTFE Laminate 50x

PTFE Coated Fabric 50x
