

OPTILINER™ and SUPRALINER™ Film Release Liners

OptiLiner Film Release Liners feature ultra-smooth, optically clear films designed for the optical products market.

SupraLiner Film Release Liners are designed for general purpose use and feature low silicone transfer to avoid compromising adhesive formulations.

The Composites Group of Saint-Gobain Performance Plastics is the leader in manufacturing broad-line surface coatings in standard and custom formulations to industry. Our expertise is design and development of coating technologies. We specialize in silicone and non-silicone film release liners used on self-adhesive products. Flexible engineering and manufacturing capabilities enable us to design products for a diverse range of applications and disciplines. We combine a variety of chemical coatings and substrates with unique processing capabilities to produce component-level materials or complete coated, laminated and finished end-user products. Composite formulations are used in critical applications in the medical, transport, electronic and industrial fields.
